# STANDARD AND SPECIAL CLAMPING FOR METROLOGY LAB

Engineering and construction of standard and special customized clamping and fixture device for measuring equipments.

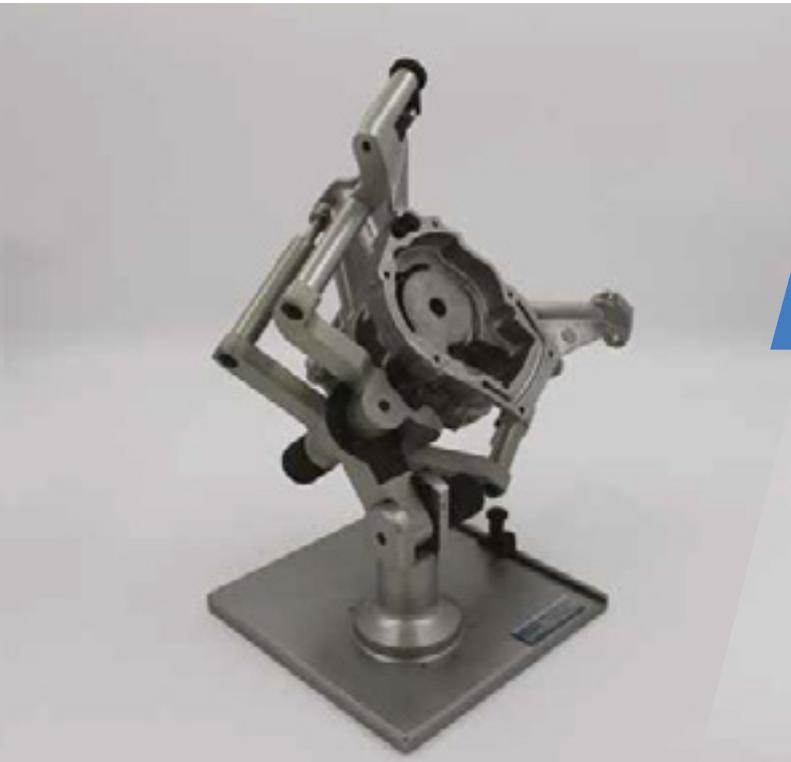

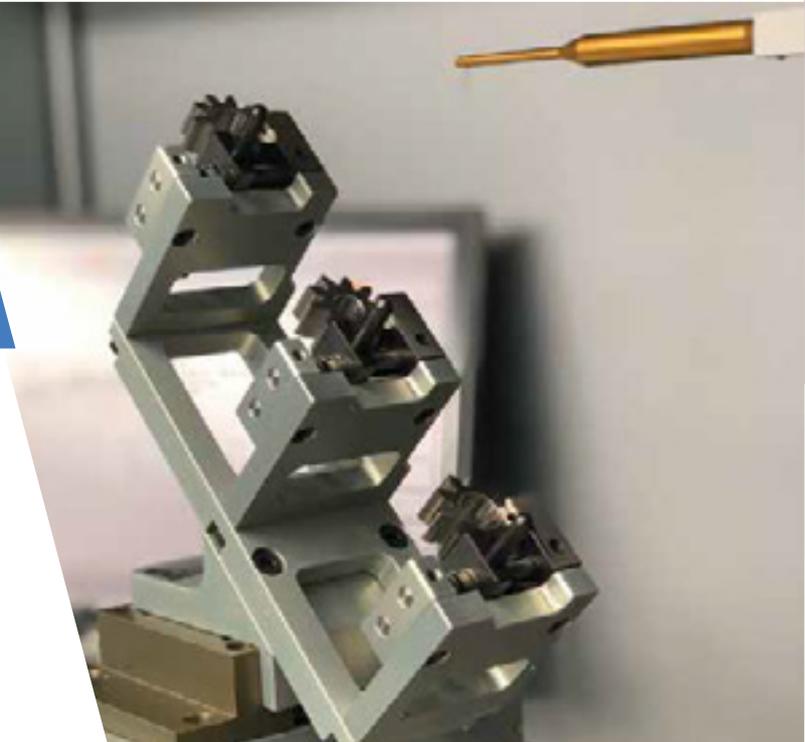

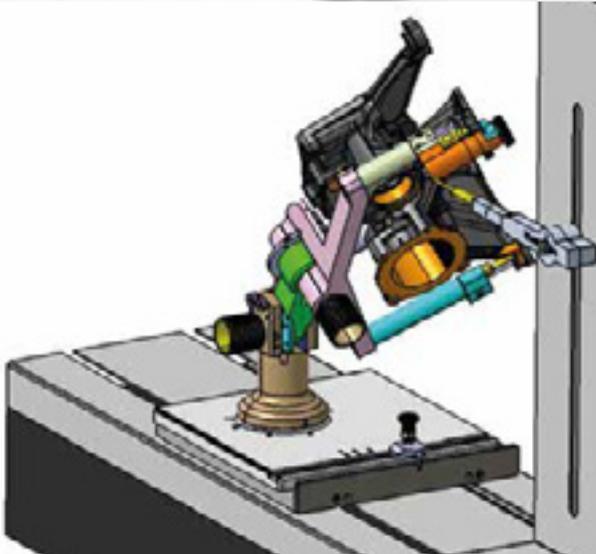

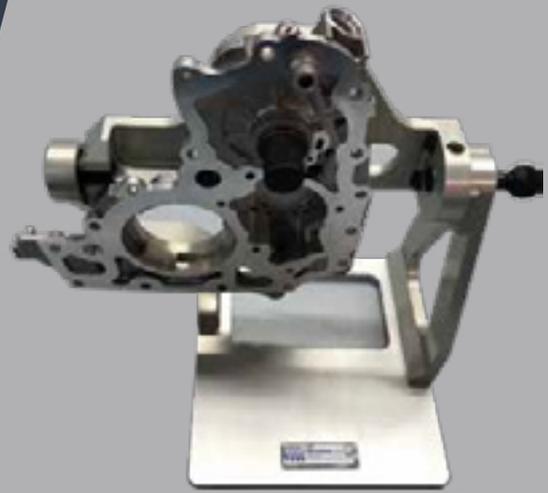

A very significant role for us plays the design based on our long-lasting experience. Application area trusted to highly qualified designers capable to guarantee always customers functional and innovative solutions for metrological control and measuring strategies without neglecting ergonomic and aesthetic aspects.

---

- ▶ Clamping system with interface for measuring equipments like:
    - > Roundness tester
    - > Roughness & Contour
    - > Optical and tactile CMM's
  - ▶ Precision chuck for gear measuring center
  - ▶ Interfaces with quick changeover for CMM's with or without rotary table
  - ▶ Probe systems with light weight and extremely high rigidity in order to avoid any regulation in case of probe changing
  - ▶ Special customized gauges for shop floor using standard measurement instruments
-
